Abbott, U. K. and V. S. Asmundson, Scaleless, An Inherited Ectodermal Defect in the Domestic Fowl, 63.

About Mice and Man, (Rev.), W. E. Heston, 128.

Alley, Curtis J., Cytogenetics of Vitis. II. Chromosome Behavior and the Fertility of some Autotetraploid Derivitatives of *Vitis vinifera* L., 195.

Amino Acid Turnover in Brain Compared with Turnover in Other Tissues, Joseph W. Still, 202.

Animal Genetics:

Blood fluke, chromosomes and sex, 3.

Cat: offered for research, 56; four-ears, a recessive mutation, 57; yellow Siamese, 57.

Cattle: evidence of a new lethal gene, 81; notched ears, 244.

Crawfish, dimorphism of chromatophore patterns, 91.

Cytology and Cytogenetics, (Rev.), 153.

Dog: offered for research, 56; brachyury in Cocker Spaniels, 75; inheritance of coat color (Rev.), 247.

Drosophila, selection for larval development, 265.

Fish, lordoscoliosis, 251.

Fowl: scaleless, 63; congenital loco in turkeys, 173; sex of parthenogenetic turkey embryos, 217; mitotic chromosomes, 227; genetic relationship and reactions to skin grafts, 235.

Hamster, number of spermatozoa transported into the female tract, 107.

Honey bees, diploid male tissue as new evidence on sex determination, 160.

Iceryine coccid, chromosomal and cytoplasmic microfibrillae, 51.

Mice, nutritional strain difference, 84; pregnancy induced in genetically sterile, 97; new allele at the *W*-locus, 119; About Mice and Man, (Rev.), 128; quivering, a first chromosome mutation, 176; amino acid turnover, 202; pleiotropic effects of short ear gene, 205; prenatal mortality in polydactyl, 282; black-eyed white — (not *W*), 300.

Mink, curley and angora characters, 129.

Mule, fertile mare, 29.

Progeny tests, 138.

Schistosomatium douthitti, chromosomes and sex, 3.

Sheep, recessive black, 255.

Steatococcus tuberculatus, chromosomal and cytoplasmic microfibrillae, 51.

Wasp, Mormoniella merry-go-rounds, 31.
